Bazaar answers fashion questions that will help readers look fabulous at every age. March 19, 2010 Dan and Corina Lecca How old is it for short shorts? Patterned tights working on everyone? Bazaar solves these and other fashionable quads, so you can look fabulous regardless of your age. 1 of 8 Fashion Q&A A question: At what age should you stop wearing short shorts? A: Once you've finished college, pack 'em in As for city shorts that hit above the knee, this look has legs for all ages while they're paired with smart menswear 2 of 8 Fashion Q&A A Q: At 45, I feel tart in five-inch stilettos or wedges, but as an old lady on kitten heels. What is the right height for my age? A: There comes a time when super-stylish shoes in extreme heights are simply too much 3 of 8 Fashion Q&A A Q: Prints are my passion. Mixing them only for the young or young at heart? A: Both! Great style does not age. And pairing bright prints like florals and ikats can be modern and ultimately age-old. The trick here is to make sure 4 of 8 Fashion Q&A A Q: Everyone says a leather jacket is immature, but in my 60s, will I be like a fashion victim? A: By and large, the skin is a luxurious staple. Keep the lines and color of your jacket classic (black or cognac) and you'll look just 5 of 8 Fashion Q&A A Q: I'm 35. Is it too old to sport all these festive socks I've seen on the runways? A: Ach, socks. They are an endless source of disagreement. If you've always loved them, go on, but always consider this event. They are not suitable for 6 of 8 Fashion Q&A A Q: When is the short one too short? What is Hamelin at what age? A: Microminis is ok for those in their 20s; average lengths work for thirtysomethings. But once you press 40, aim just above the knee. This measure can carry you through just like 7 of 8 Fashion Q&A A Q: I'm in my 40s and my leggings are dressing rooms staples. Should I wear real pants instead? A: Leggings are a great paper clip, regardless of age. It's not how old you are, it's how thin your hips are. Just keep in mind that they are 8 of 8 Fashion Q&A A Q: Many models wore patterned tights on the runway and I'd like to try it, but I'm middle-aged. Will it look like I'm trying too hard? A: If they mesh with your style, patterned tights can look appropriate and give your ensemble an advertisement – Continue reading below This content is created and supported by a third party, and imported to that page to help users provide their email addresses. This credit union updates its online banking website, so pilot fish with accounts there updates all of her family's accounts. New New there were safety issues, says Fish. I didn't like those three that were given, so I made a drop-down menu to see more questions. I chose my three new questions and wrote answers to make the couple know they were. But the first time he tries it, it undermines the password. Fish must go through the entire process of recreating your account settings. The next time he tries, the fish has to go through the whole process again - but this time she'll print the screen captures the questions she's chosen and writes answers to them. To make sure this doesn't happen a third time, the fish strolls it through the login process. But when they took up security concerns, the one that pops up is not one of the new issues the fish has selected. I deliberately chose questions I knew he could answer,' fish says. I went around the question of which high school I graduated from, but there it was, waiting for an answer. During my last script attempt with three attempts or you blocked, I mentioned that this was the first question of their three original options. So I provided the answer I used for the first question: Where were you born? Bingo, I was u. It's funny, thinks fish. It puts in a call to the same customer service representative who has already reset the account password twice. The rep tells the fish that many people get locked up on safety concerns. Can I talk to a programmer? Fish asks. I can't pass you on, says rep. Ok, write this down and give it to the IT department, says Fish. Tell them that while they allow users to select new questions, they record answers but keeping the original default questions as first presented. I also asked where to send my account to solve problems, but never heard from them, says Fish. But now we have a way to make security questions unanswered by hackers. For example, when asked Where were you born? we make a key in the year of the account owner's birth as a response. Answer Sharkey's call for true tales about IT life! While the word geography comes from Greek and literally means writing about the land, the topic of geography is much more than describing foreign places or memorizing the names of capitals and countries. Geography is an all-encompassing discipline that seeks to understand the world — its human and physical characteristics — through understanding location and location. Geographers are studying where things are and how they got there. My favorite definitions for geography are the bridge between human and physical sciences and the mother of all sciences. looks at the spatial connection between people, places and land. Many people have an idea of what a geologist does, but have no idea what a geographer does. Although geography is usually divided into human geography and physical geography, the difference between physical geography and geology is often confusing. Geographers tend to study the surface of the earth, its landscapes, its features, and why they are where they are. Geologists look deeper into Earth than geographers and study its rocks, internal earth processes (such as plate tectonics and volcanoes), and study periods of Earth's history many millions and even billions of years ago. A student (college or university) education in geography is an important start to become a geographer. She received a bachelor's degree in geography, a geography student can start working in various fields. While many students begin their careers after achieving bachelor's education, others continue. A master's degree in geography is very useful for a student who wishes to teach at the level of a high school or community college, to be a cartographer or specialist in GIS, work in business or government. A doctoral student in geography (ph.D.) is needed if he wants to become a full-fledged professor at the university. Despite the fact that many candidates of sciences in geography continue to form consulting firms, become administrators in government agencies or achieve high-level research positions in corporations or think tanks. The best resource for studying colleges and universities that offer degrees in geography is the annual edition of the Association of American Geographers, a Guide to Geography Programs in the U.S. and Canada. Unfortunately, the position of geographer is not often in companies or government agencies (with the most notable exception of the U.S. Census Bureau). Still, more and more companies are recognizing the skill that a geographically trained person brings to the table. You will find many geographers who work as planners, cartographers (cartographers), GIS specialists, analysis, scientists, researchers and many other positions. You'll also find many geographers who work as instructors, professors and researchers in schools, colleges and universities. Being able to view the world geographically is a fundamental science for everyone. Understanding the connection between the environment and humans, geography connects different sciences like geology, biology and climatology with economics, history and location-based politics. Geographers understand conflict around the world because so many factors are involved. Greek scientist Eratosthenes, who measured the circumference of the earth and the first to turn on the word geography, is commonly referred to as the father of geography. Alexander von Humboldt is commonly referred to as the father of modern geography, and William Morris Davis is commonly referred to as the father of American geography. Taking courses, reading geography books, and of course learning this site are great ways to learn. You can increase your geographic literacy of places around the world by getting a good atlas, such as the Hood World Atlas and using it to look for unfamiliar places anytime you encounter them while reading or watching news. Soon you will have great knowledge of where the places are. Reading travelogues and history books can also help improve your geographical literacy and understanding of the world – they're some of my favorite things to read. Things are looking for geography! More and more schools across the United States are proposing or requiring that geography be taught at all levels, especially in high school. The introduction of a course of expanded placement of human geography in secondary schools in the 2000-2001 academic year increased the number of college-ready geographical specialties, thereby increasing the number of geography students in undergraduate programs. New geography teachers and professors are needed in all areas of the educational system as more students begin to study geography. GIS (Geographical Information Systems) has become popular in many different disciplines, not just geography. Career opportunities for geographers with technical skills, especially in GIS, are excellent and should continue to grow. Grow.
